About the Speaker

Steve Stasiukonis

Steve Stasiukonis is the President of Secure Network Technologies and a nationally recognized cybersecurity expert with more than 29 years of experience in information security. He leads advanced initiatives in penetration testing, information-security risk assessments, incident response, and digital investigations, helping organizations identify critical vulnerabilities, understand their cyber risk, and strengthen their overall security posture.

Widely recognized for his expertise in social engineering, Steve specializes in demonstrating how threat actors exploit human behavior—alongside technology—to gain access to organizations. His work combines hands-on technical expertise with real-world adversary tactics, giving organizations practical, actionable insight into how attacks occur and how they can better defend against them.

A respected thought leader in the cybersecurity community, Steve regularly provides expert commentary and writes for leading technology and security publications, including *InformationWeek* and *Dark Reading*. His work focuses on emerging cyber threats, attacker methodologies, and effective defensive strategies for today's evolving threat landscape.

Thank you!
